## GOOD USED CARS

### SOLD WITH A GUARANTEE.

We have the Car for you—a Car your size, and at your price. Here are real values offered in these automobiles of various makes:

1929 CHEVROLET TRUCK,	\$300
1927 Falcon-Knight Sedan,	\$110
in good running order;	
1931 Special Chevrolet Roadster,	\$350
in good condition,	
1929 Essex Coupe,	\$275
in excellent shape,	
1932 Willys Sedan,	\$400
in excellent shape,	
All Cars Reconditioned and in Good Shape!	

## Sommerfield & Mayer,

Agents for CHEVROLET and OLDSMOBILE CARS.  
Agents for BRITISH AMERICA OIL CO. and all their Products: Hard Oils, Greases, Trainers' Oils, Belt Dressing, etc. etc.

SERVICE GARAGE, Stony Plain.

DON'T BUY IN THE DARK.  
SPEND YOUR MONEY FOR  
ADVERTISED GOODS.

### Town's Municipal Elections.

The 1934 Town Council will hold another meeting before dissolution. The retiring Councillors are: Christie, Hoffman, Michael. The continuing members are Councillors W Barth, B Breitkreutz and H Oppertshauer. The Mayor's term of office has another year to run.

On another page will be found the Auditor's financial statement for the year ending Dec 31, 1934, Town of Stony Plain.

### Inga's Annual Meeting.

Secretary Best, of Inga Municipal District, announces the holding of elections for Councillors in Inga M.D. on Saturday, February 16th. The annual meeting of Inga ratepayers will be held in Stony Plain on the same date, when nominations for Councillors will take place.

The retiring Councillors are—M. McKinley, Div. 1; A E Hopkins in Div. 4 and John Staub, in Division 6.

### A Feast of "Murphies."

A Potato Social is billed to be held on the evening of Friday, Feb. 1st, at the local United Church. The affair is under the auspices of the Junior C. G. I. T. Lunch will be served. Your entrance fee of 5c entitles you to the potatoes, which are to be served in three styles—boiled, fried, and fricasse. The balance of the interior decorations will be on sale at reasonable prices, with a top limit to each purchaser of 4 bits.

### UFA Convention Postponed.

The Executive Committee of the Stony Plain Provincial Constituency Ass'n have thought it advisable to postpone the holding of the Nominating Convention. This convention had been billed for Saturday next, the 26th. On it being discovered that the further-out Locals had not received their notification in time to allow them to call meetings for the election of delegates to the Nominating Convention, the Committee considered it advisable in the interests of all concerned to agree to the postponement.

The Committee will be holding another meeting in Stony Plain on Friday, February 1st, when the new date for the Nominating Convention will probably be set.

It is the intention of the Committee to have members in the whole 24 UFA Locals in the Constituency notified, so that none will have a legitimate grievance when the delegates do meet for the purpose of nominating a candidate.

### Obituary.

The funeral took place Thursday, the 17th, of Mr. Philip Lutz, a former resident of the district but who for a number of years had been living in the City. Deceased was aged 76 years. A service was held in Saint Peter's Lutheran Church, Edmonton, by the pastor, Rev A J Mueller. Interment was made in the churchyard of Saint Matthew's church (Missouri Synod) Stony Plain. He is survived by 5 sons and 6 daughters—one of the latter being Mrs E. Hennig, Stony Plain.

Agent for Swift's Canadian Creamery.

## Dominion Government Carries Medical Aid To Arctic And Sub-Arctic Areas

The provision of medical care for the native inhabitants of the Northwest Territories is a responsibility of the Dominion government. For thousands of miles along the Arctic coast of the Dominion, in fair weather and in foul, government medical officers bring their healing art to the aid of our Eskimo citizens, while Indian, half-breeds and indigent whites are also given medical aid. Winter and summer patrols of hundreds of miles are not unusual and nearly every mode of transport known to the north country—airplane, steamboat, motor boat, canoe, and dog-sled—has been used to extend the service.

In all eight doctors are employed in this work. Dr. J. A. Urquhart, stationed at Aklayik in the delta of the Mackenzie river, is Canada's farthest north practitioner, while the other doctors are stationed as follows: Dr. A. G. MacKinnon, at Pangnirtung, Baffin Island; Dr. J. M. Morrow, at Fort Smith; Dr. T. O. Livingstone, at Chesterfield on the west coast of Hudson bay; Dr. T. O. Byrne, at Cameron Bay, Great Bear lake; Dr. C. Bonny, at Resolution, Great Slave lake; Dr. P. W. Head, at Good Hope, on the Mackenzie river; and Dr. W. A. M. Truesdell, at Simpson, near the junction of the Liard and Mackenzie rivers.

As the department primarily responsible for the administration, including the care of the Eskimos, of Canada's vast northern possessions, the Department of the Interior, which Hon. Thomas G. Murphy is minister, contributes a major portion of the cost of maintaining doctors in the Far North. That this work among the Eskimos is bearing fruit is shown by the reports of the doctors stationed in what is termed Eskimo territory. While civilization has brought many benefits to these natives, its contact with these happy and hospitable people has also resulted in a number of ill effects. Although a healthy and organically sound race, the Eskimos are seriously susceptible to ailments which ordinarily cause white people only minor discomforts. Before the coming of the white man the Eskimos were isolated along Canada's Arctic coast, and they knew nothing of the common ills of the newcomer—colds, influenza, and other kindred ailments. There had been no need for their bodies to build up a resistance to the attacks of these diseases. Consequently the arrival of the first whaling and trading vessels each season was followed by widespread outbreaks among the natives, with often disastrous results.

To-day the medical services in the Far North take particular care upon the arrival of the first ships to check the spread of these diseases and the hope is that in time, as closer contact is made with the outside world, the natives will have built up the necessary resistance to ward off such attacks.

By painstaking instruction, the doctors have reduced considerably the number of deaths due to dietary causes. The most striking success has been in the correction of methods of feeding infants and older children. In the Mackenzie River area it was not uncommon for ninety per cent of the cases treated at the mission hospitals to be due to "wrong" feeding during the infant's first season. This has been almost entirely corrected.

By the setting aside of preserves for the use of the native population only, the Eskimos are being encouraged to follow as much as possible their natural pursuits. Every effort is being made to have them continue their hunting of the seal and caribou so that the necessary proportion of fat so necessary to meet the rigours of the far northern winters may be maintained. Thus the ill effects of too great a dependence on white man's foods are being counteracted. In other ways the health of the natives is being safeguarded and improved through the watchfulness of the Department of the Interior, the benefits being derived from the

W. M. U. 2068

Eskimo's contact with civilization are preserved and any harmful effects overcome or avoided.

### Eclipse Of The Sun

In 1935 There Will Be Seven Eclipses Of The Sun And Moon. Seven eclipses of the sun and moon, an unusually large number, take place in 1935. Two will be visible in Canada and the United States.

The first of these is a partial eclipse of the sun on February 5. At maximum, seven tenths of the sun's diameter will be covered by the moon's shadow, enough to chill the air and turn the sunlight temporarily greenish-yellow.

This maximum shadow will cover the United States west of the Rockies, and nearly half of western Canada. In the rest of the United States and Canada it will be less, a smoked glass spectacle.

The second eclipse visible in Canada and the United States will come on July 16, a total eclipse of the moon.

"There will be this year the rare happening of the maximum number of eclipses that can occur in one year," says Herbert C. Wilson in popular astronomy.

"There are five of the sun, two of the moon. There might be four of the sun and three of the moon; but there never can be a total of more than seven."

### Defective Teeth

Scientists Find 'Trouble' Comes As Aftermath Of Severe Rickets

A new clue to causes of faulty tooth development, showing defective teeth often are an aftermath of severe rickets, the bone disease of childhood, was reported by the children's bureau at Washington.

Scientists of the bureau, in examining two groups of children, one of which had had severe rickets in earlier years, and another which had been practically free of the disease, found many more defective teeth among the children who had been rickets victims.

The study proved some defects in development of teeth can be greatly lessened and usually prevented by giving children frequent sun baths and plenty of cod liver oil when they are at the rickety age, the scientists said.

### Lark Is Destructive

Farmers In England Not Very Keen About Songster

Even if Shelly wrote an ode about it and Schubert was inspired by it to compose a beautiful melody, the lark is just a bird that damages wheat and other crops. So declare the farmers in the vicinity of Norfolk, England, and they have started a war on the songster. The Norfolk Agricultural Committee has excluded the bird from the new order under the Wild Birds Protection Act. Anyone therefore may shoot it and have kark pie. "The skylark is a nice bird, but we don't live by listening to its music," said George Hewitt, an agricultural leader. The larks are said to invade England in flocks from Germany and Russia.

Incensive To Growth

What a grand incentive to growth, development, and service is the thought that life is to go on for ever—that we are not acquiring knowledge for this state of existence only, but that every truth of God which we learn, every experience through which, in the Divine leading, we are called to pass, has its part in the building up of a character which shall never die.—Francis Thompson.

Standardized grading appears now to have become definitely established as a permanent factor in poultry raising, all phases of the poultry trade in Canada.

Stratosphere explorers say the sky appears to be a deep purple at the great heights to which some of the stratosphere balloons launched by scientists have risen.

### U.S. Shelter Belt Plan

Four Million Trees To Be Planted

Next Spring Four million trees will be planted next spring, it was announced at Washington, as a start on the forest service's vast shelter-belt designed to sweep from Canada to the Texas panhandle.

The American Tree Association declared that 23 of 36 plantations areas had been selected tentatively each calling for plantings of 130,000 trees in strips five miles long and 10 rods wide. They will be established in the Dakotas, Nebraska, Kansas, Oklahoma and Texas.

Designed to provide windbreaks for cultivated land, the project was endorsed by President Roosevelt and set in motion with an allotment of \$1,000,000 in 1934. When completed it will provide a belt of trees planted in the 10-rod wide strips over a 200 miles wide area.

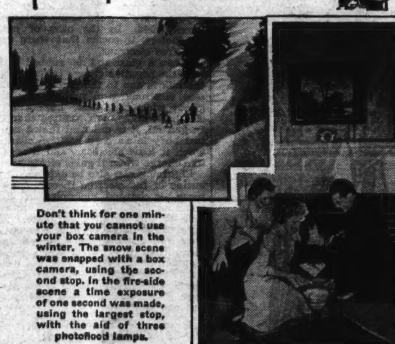

### The Same Firm

At a rural railway station one man acted as stationmaster, signman, porter, and ticket collector. Even then he sometimes had a little time to spare. A passenger one morning found him sweeping the little platform with fierce energy. "Why, my man," said he, "you're going about your job as though you were a stationmaster." "Bless my firm, sir," replied the man, bristling and muttering and rearing his sweeping.

Chemists are trying to learn the secrets of the molecule, just as physicists are trying to learn the structure of the atom.

## The SNAPSHOT GUILD

Respect Your Box Camera

Thousands of people of all ages are very much interested in the fascinating hobby of picture taking, own box cameras but, believe it or not, have permitted an inferior complex to creep upon them, as far as respect for the performance of their cameras is concerned. Now that really sound cameras are so plentiful, nevertheless, readers have written to the Snapshot Guild with a tale of woe about waiting for spring to arrive to make a concerted effort to improve their pictures. So many owners of box cameras seem to be of the opinion that the sun must be shining like horses before they should try to take a picture.

What is to follow is directed right straight at you, and you and you will ever be able to take if you live in peaceful slumber on the closest shift awaiting the arrival of spring and bright sunlight. It is just that it off—and be sure you wipe off the lens carefully with a soft, dry cloth get your camera in good shape and start shooting. There are more interesting winter pictures waiting to be made with a box camera than you will ever be able to take if you live to be as old as Methuselah. Remember, too, that the old Biblical passage still holds good—"Dark and yet small and"—and it will not take much seeking if your eyes are open. Under ordinary conditions you can take instantaneous snapshots outdoors in the winter, or, if the day is too dark and dreary, then it is always the old reliable flash lamp. If the day is clear and bright you can take action pictures, providing you snap the picture at the right angle and are not too close to the object.

Pictures can be taken indoors at night with a box camera if you use one of the incandescent photoflood lamps. A little more care will be necessary until you know your camera and cannot expect from your box camera, and if you are a real

## Renowned Varieties Of Grain Now Grown In Canada An Epic In Scientific Achievement

### The Noise The Weevil Makes

Magnified Ten Thousand Times It Created Some Noise

A boll weevil, cause of so much sorrow to farmers of the south, was a star performer for science in New York.

The noise the weevil makes when "chewing" was magnified by a "sound microscope"—10,000 million times and the noise was so great that it could be heard all over one of the buildings at New York University.

Dr. E. E. Free, who demonstrated the "sound microscope," said he did not dare use the device in connection with any sound normally heard by the human ear.

The purring of a cat, if amplified 10,000 million times, he declared, could be heard in San Francisco without the aid of telephone or radio.

### A Very Bad Habit

Thousands of people remain pyromaniacs all their lives because they never dare be themselves. They are afraid to take the initiative. They ruin their judgment by not using it, by depending upon others, running to them for advice, and always following the track marked out by some one else. They are mere echoes, trailers.

The continuous success of Canadian farmers in international and world grain shows calls attention to the fact that among the various factors contributing to Canada's distinction as an agricultural country is the availability of many varieties of cereal grains of outstanding worth. It was not always so. For 270 years following the landing of Louis Hebert, Canada's first farmer, in 1617, the varieties available were largely imported and however well adapted they may have been to the soil of their native countries, it became evident that if Canada's purely opened wheat belt was ever to attain a position of prominence it must have a variety of wheat capable of maturing earlier than Red Fife which was then commonly grown. Indeed, this imperative need was one leading reason for the establishment of the Dominion Experimental Farms in 1886. How well they have discharged their high duties in originating among other things, the renowned varieties of grain now grown in Canada is an epic in the realms of scientific achievement. To-day the Canadian farmer has the choice of outstanding varieties of spring wheat, fall wheat, oats and barley, while in addition to the Dominion Experimental Farms still pursue another important role which is of incalculable value to the Dominion. There are promising new varieties now under test, such as rust-resistant wheats and oats, as well as certain barleys, possessing characteristics of immense practical importance, giving every indication of being destined to be included in the near future among the now famous varieties of the Dominion of Canada.

### Animals Play Like Children

Most Young Ones Are Fond Of "Tag-of-War"

Animals play games of their own invention, as children do. Most young animals are exceedingly fond of "tag-of-war." Young foxes are particularly addicted to this form of sport, pulling against one another, every night and morn, and every dog lover has been terrified during the same thing. Others are fond of "shooting the chute" down a slope already well worn by generations of "shooters." Mammals, too, play a game called "King of the Castle" by moonlight. One of them mounts to the summit of a hillock and holds it against all comers, the badger who drives him off taking his place until he, too, is dispossessed. They play in perfect good temper for hours at a stretch. Lambs are often observed to play a similar game. Both cats and dogs play hide and seek. A dog and a cat in the same house will thus play together, but the cat always hides and the dog finds.

### Time Well Spent

Occasional Breathing Space Make Day's Work More Efficient

Immediately after breakfast, just sit still for a matter of ten minutes or so before plunging into the day's activities. This makes all the difference between a worn-out man at five o'clock in the afternoon. During the morning, don't say: "I haven't a moment to spare." Sit down and have a cup of tea or coffee at eleven o'clock. You will go on with renewed vigor. When travelling, if you can spare time, go into the refreshment room and have five minutes' rest and something to eat and drink. When shopping, don't tear from one shop to another without pausing, so that at the end of the day you can stand up ready only for bed. When spending a book, pause every now and then and think over what you have been reading. This will rest the eyes and make the book more enjoyable.

Customer: "Olinger Ale."

Waiter: "Tale."

Customer: "No, just a glass."

President Andrew Johnson was a tailor for seven years before he learned the alphabet.

JOHN VAN GUILDER

Parent, concluding the recital of his exploits—"And that, my boy, is what I did in the Great War."

Son—"But, Daddy, why did they

## SAAR TERRITORY PASSES INTO THE HANDS OF NAZIS

Saarbrücken, Saar Basin Territory.—Adolf Hitler's Saar opposition crumbled completely and the Saar, in effect, passed into Nazi hands.

The League of Nations government was still in nominal authority, but it was evident the league commissioners, bowing to the will of the people expressed in the plebiscite's 90 per cent. pro-German vote, meant to stand to one side.

As unconfirmed reports reached this capital that five persons had been killed and several wounded in post-plebiscite fighting, the demoralized anti-Nazi Common Front moved its headquarters across the border to French soil.

Despatches from Forbach, France, said several hundred Saar refugees arrived on French soil. Four of them reported they had been fired upon as they started to turn back to the Saar. French authorities were anticipating many thousands of self-exiles, the despatches said.

Blueshirt police, controlled by Nazis, moved into the Socialist welfare centre from which the anti-Nazi plebiscite campaign had been directed, swept out several hundred Hitler opponents, and occupied the building.

Berlin.—Appeals to buy Saar goods flooded Germany further to prove the Nazis meant business when they promised Saarlanders they would be made to feel at home in the fatherland.

## Low Interest Rates

Ontario Government Secures Lowest Rates in Province's History

Toronto.—Sale by the Ontario government of treasury notes at the lowest rate in the province's history was announced by Premier Mitchell F. Hepburn. The premier said a \$20,000,000 issue has been disposed of at an interest rate of 2.25 per cent.

The notes are reported to be for a two-year term, and will take care of the six per cent. issue of some \$5,000,000 which matures on Feb. 3 and will be used also to refund short term indebtedness and for certain capital expenditures.

## France Is Anxious

Fear Saar Plebiscite Not Enough To Pacify Hitler

Paris.—A hope his victory in the Saar plebiscite would satisfy and pacify Adolf Hitler, who had sold France, but there is an undercurrent of anxiety lest he become more dangerous.

Officials were startled by the feeble showing of the status quo adherents, but they took the outcome with the best grace possible, reminding the world that France maintained neutrality and the vote, after all, was purely an affair between Hitler's friends and his foes.

## Deal With Hitch-Hikers

Lansing, Mich.—Upon the thumb and the thumb alike will the heavy hand of the law descend if the Michigan legislature acts favorably upon a bill introduced in the house to end the era of the hitch-hiker. The proposed act would make it a misdemeanor for one to stand at a roadside and solicit a ride and a misdemeanor for an automobile driver to pick up a hitch-hiker.

## Reconciliation Is Sought

London.—A reconciliation between former King Alfonso of Spain and Queen Victoria will be sought by their eldest daughter, now Princess Alexandra Torlonia, when she brings her husband here in the next few days for presentation to the former queen.

## Prefers Newspaper Advertising

Hamilton, Ont.—Candidates for municipal offices get their best publicity in newspapers and should dispense with other means of advertising. Mayor H. E. Wilson declared during a discussion at a Hamilton hydro meeting.

W. N. U. 2082

## Farm Board Appeals

Board of Review For Alberta Sitting At Edmonton

Edmonton.—Faced with a list of 36 appeals from farmers in this district, the board of review for Alberta, appointed under the federal Farmers' Creditors' Arrangement Act, has begun its sittings here.

The board, composed of Mr. Justice Ewing, chairman, with S. H. McCaig, K.C., representing the creditors, and H. B. Macleod, High River, for the debtors, will hear three cases daily for the next three weeks.

After the sittings here, the board will leave for the north country and hear cases at Peace River and Grande Prairie. After three weeks in the north, the board will return to Edmonton, when announcement will be made of further sittings.

General reduction of two per cent. in the rate of interest was shown by the board's first batch of awards. In some cases, rates on mortgages were cut from eight to five per cent.

## Cheers For Brownlee

United Farm Women of Alberta

Calgary.—Mrs. Richard Price, of Stettin, was re-elected president of the United Farm Women of Alberta, at the annual convention here. It was her third term.

The women heard addresses by J. E. Brownlee, Dr. M. E. Roy, deputy minister of public health; Hon. J. S. Girdale, minister of agriculture, and Mrs. Zella H. Spencer, Edmonton.

Rousing cheers were given by the 100 women delegates and many visitors when Mr. Brownlee, former premier, took the platform to speak. Mrs. Price, extending the thanks of the convention, said she hoped Mr. Brownlee would soon be back in his rightful post as "head of the Alberta government."

## War On Timber Wolves

Edmonton Chamber Of Commerce Asks Government To Offer Bounty

Edmonton.—War was declared on timber wolves and cougars in Alberta by the Edmonton Chamber of Commerce, which will ask the provincial government to place a bounty on their heads.

Attention was drawn to the timber wolf crisis by the St. Paul Board of Trade which complained that deer in that district are being killed off by increasing numbers of wolves.

From the area west of Edmonton a report was received by the chamber that cougars were causing similar damage to big game.

## Fox Fur Farming

Canadian National Fox Breeding Association Meet At Saskatoon

Saskatoon.—Fox fur farming in 1934 was reviewed by 40 delegates representing every province in Canada at the 15th annual meeting of the Canadian National Silver Fox Breeders' Association here—the first annual meeting in the history of the industry to be held in a city west of Toronto.

Technical changes in the constitution came up for discussion, with George Calbeck, of Summerside, P.E.I., president, in the chair.

The last annual meeting was held in Quebec city.

## Celebrates Birthday

Veteran Of Riot Rebellion Still In Good Health

Thistledown, Ont.—Edward C. T. Doole, veteran of the riot rebellion and one of the rebel's guards pending the latter's removal to Regina, has started on his 78th year of life, still in good health and of youthful appearance for his years. Doole celebrated his 77th birthday at his home here on Jan. 14. He came to Canada from Northern Ireland more than 40 years ago.

## Urgo Trade Treaty

Ottawa.—Negotiations of a trade treaty with the United States will again be urged in the House of Commons this season by William Duff, Liberal member for Antigonish-Guysboro.

## VICEROY BUYS NEW PLANE

LORD WILLINGDON

So satisfactory have been the journeys made by air to various parts of India in the past two years by the Viceroy of India that Lord Willingdon has purchased a large four-engined plane for regular use in travel about the sub-continent.

## Would Revise Plan

Alberta Member Advocates Superannuation For All Over 55

Calgary.—George C. Coote, M.P. for MacLeod, has urged superannuation of all persons over 55 years of age, guarantee of employment to persons under that age, stabilized farm prices at the 1929 level and a financial system controlled by the public.

Addressing the annual convention of the United Farmers of Alberta, Mr. Coote declared farmers would be included in the superannuation plan, which would pay about \$50 monthly. It would not be compulsory. Under the plan thousands of younger men would replace those getting pensions.

## Study Drouth Problems

Want Federal Commission To Investigate Conditions In West

Winnipeg.—Creation of a permanent federal commission to study the drouth problem in Manitoba, Saskatchewan and Alberta, and direct corrective measures, was approved at the annual meeting of the Association of Manitoba Land Surveyors here.

It was suggested the entire area might be divided into zones suitable for grazing, cultivation, or eliminated from cultivation, according to the nature of the soil and available water supply.

## Radio For Fire Chiefs

Winnipeg.—Equipping the automobiles of district fire chiefs with radio is proposed here by Fire Chief D. A. Boulden, who says much wasted time would be saved by transmitting calls through the police short wave equipment.

## French Cabin Seaplane

Designed To Carry 70 Passengers On Trans-Oceanic Service

Bordeaux, France.—A huge French cabin seaplane designed for trans-oceanic service and capable of carrying 70 passengers made its first trip into the air recently.

The 37-ton ship, christened the "Lieutenant de Vaisseau Paris" and called here the largest aircraft in the world, sailed gracefully over lake Biscarosse in its trial flight. The crew numbered seven.

Trial trips to North and South America are planned soon after the preliminary tests here are completed.

The seaplane, propelled by six motors of 850 horsepower each, is 104 feet long, has a wingspread of 183 feet and stands 30 feet high.

Mounted in its duriuminum and stainless steel fuselage, arranged with two decks, are 12 de luxe cabins, as large as those on trans-Atlantic liners, each of which has two beds and a private bathroom. There are accommodations for 10 other first class, and 42 second class, passengers.

## Favors World Court

President Roosevelt Asks Senate To Ratify American Adherence

Washington.—In the interests of "world peace," President Roosevelt asked the United States senate in a special message to ratify American adherence to the world court.

The brief presidential message also urged that ratification "be given in such form as not to defeat or to delay the objective of adherence."

This was interpreted in senatorial circles as representing opposition to any new reservations.

Mr. Roosevelt asserted that for years both Republicans and Democrats in party platforms had favored adherence.

"The sovereignty of the United States," he said, "will be in no way diminished or jeopardized by such action. At this period in international relationships, when every act is of moment to the future of world peace, the United States has an opportunity once more to enlarge its weight into the scale in favor of peace."

## Shark Is Stranded

Vancouver.—Ten feet six inches of live shark was found fighting for life on the shore of Stanley park in Coal harbor, where it had apparently been trapped by the ebbing tide. The giant fish, one of the shovel-nosed sharks, was almost dead when discovered by three men cutting wood on the beach.

## Geis Bank Appointment

Ottawa.—Appointment of E. A. Henderson, of Toronto, to be chief of the securities division of the Bank of Canada has been announced here. Mr. Henderson was born in Ontario 31 years ago and was educated at the Geis college institute and at McGill University, Montreal.

## BRITISH LORD CHIEF JUSTICE WEDES

Here we see Lord Hewart, Lord Chief Justice of England, leaving the Parish Church of Tottenham, Hertfordshire, with his bride, the former Miss Jean Stewart, after the wedding ceremony. Lady Hewart formerly resided at Wanganui, New Zealand, and is a cousin of Sir William Peat, the Accountant and Lord of the Manor of Tottenham.

## LEAGUE LIFTS ARMS EMBARGO AGAINST BOLIVIA

Geneva.—For the first time in its history the League of Nations took punitive action against a war-making member.

Because Paraguay has failed to accept the league's plan for peace in the Chaco, the league's Council advisory committee voted to reinforce the arms embargo against Paraguay and lift the embargo against Bolivia, which has accepted the plan.

Bolivia's "renouveau" will be free to buy and sell nations adhering to the league's embargo will be free to sell armaments and munitions.

An unprecedented step, it creates delicate problems for the United States, inasmuch as the American congress, in authorizing the embargo, stipulated that it should be interpreted against both the warring nations.

Paraguay is given a further chance, to accept the peace plan, since the resolution specifies that Feb. 24 is the date of expiration of the three months' Paraguay has to decide finally concerning the detailed plan for ending the war.

## Bandits Captured

Running Gun Fight In Illinois Results In Loss Of Lives

La Salle, Ill.—A gallant sheriff, a bank cashier and a bank robber died and three men and a boy were wounded in a series of gun battles that raged through three counties.

Three pitched engagements with 65 machine guns, took place along a 30-mile line as a quartette of gangsters sought to blast their way to freedom after they had been beaten back in an attempt to loot the Leamore (Ill.) State bank.

Charles Bundy, 54, the bank official, and Sheriff Glenn Axline, of Marshall county, were killed by the gunmen's bullets. Machine gun bullets cut aside a moment before his confederates were captured by a sharp-shooting posse on a bloodstained farm near McNabb, Ill.

## Would Amend Company Laws

Former Minister Of Trade And Commerce Urges Action

Montreal.—A drastic amendment of company laws and practices, with the establishment of a Dominion commission of industry and commerce to administer all laws relating to these matters, was urged before the Canadian Club here by Hon. H. H. Stevens, former minister of trade and commerce and former chairman of the House of Commons committee investigating mass buying and price spreads.

## Fire Destroys Mail

Edmonton.—Fire in the second mail and baggage car of a Northern Alberta Railways train to Waterways on Jan. 15 destroyed a quantity of mail, baggage and express. Loss is believed to be small. Delayed mail was returned by motor truck to the post office here by Postal Inspector Riley who happened to be a passenger.

## Cruisers Powerfully Armed

London.—Germany's new 10,000-ton "Deutschland" type cruisers are so powerfully armed, no cruiser could stand up to them and so fast no existing battleship could bring action against them, according to "Brassey's Naval and Shipping Annual," for 1935, published here.

## May Enter House Of Lords

Derby, Eng.—Possibility that J. H. Thomas, secretary for the dominions, might be going into the house of lords was suggested by the Duke of Devonshire, presiding at a meeting in honor of the cabinet minister.

## President Of Surveyors

Ottawa.—Colin H. Macdonald, Dominion department for the dominions, was recently named president of the Canadian Institute of Surveying, succeeding J. L. Rennie, Ottawa.

## Stony Plain Sun.

### Corntassel's Specialty.

"Didn't you feel resentful when that man beat you in a horse trade?"  
"No," replied Farmer Corntassel. "Horses ain't my specialty no more; but I'll bet you he couldn't have got the best of me in a motor car trade."

### Heard at the Grove.

Diner—Do you call this a round steak?  
Waiter—Yes, sir.  
Diner—Well, how many rounds does it take, to get the best of it?

### In Memoriam.

In loving memory of Rudolph Gobel, who passed away Jan. 19, 1932.  
"Tis sweet to know we will meet again  
Where parting is no more.  
And my dear husband I loved so  
well has only gone before.  
God knows how much I miss him.  
He counts the tears I shed  
And whispers "Hush, he only sleeps  
Your husband is not dead."  
Some day some time my eyes shall see  
The face I loved so well.  
Some day, some time, his hand I'll clasp  
And never say farewell.  
Ever remembered by his Wife.

### Mineral Starvation the Cause of Low Milk Flow.

Many cases are on record where the addition of minerals to the feeds of milk cows has increased the flow of milk. One record shows an increase of 80 p.c. From many tests conducted, it is now believed that phosphates and lime are the most important minerals lacking in regular feeds and this is borne out in practice where the feeding of a new type mineral stock food mono-calcium phosphate, is giving satisfactory results.

More extensive feeding tests show that cows suffer most severely from mineral starvation when they are in milk or at the end of the milking period.

There is one test that is easily made, now that farmers use fertilizers on their crops. Some straw or other feed from a fertilized crop is placed in the feed and a short distance away is placed the same amount of feed from an unfertilized crop. Cattle are turned in and if any preference is shown for the fertilized feed, the cattle indicate their natural craving for the phosphates contained in the fertilized crops. This means, of course, that there is not enough phosphates in the regular feeds.

The recommendation for correcting the condition is to use a phosphate fertilizer on feed crops or to feed a mineral supplement of mono-calcium phosphate, or both, where conditions are bad.

### Salesmen Wanted.

**MAN WANTED** for Rawleigh Route of 800 families. Write today. Rawleigh, Dept. WQR-96, S.A. Winnipeg, Man., Canada.

### Farm For Rent.

North half Sec. 26 and SW. Qr. 24, 62, 145; about 500 acres in all; practically all under cultivation; would rent on one-third crop terms. Ph. Litzberger, Stony Plain.

### AUDITOR'S CERTIFICATE.

I have audited the accounts of the Town of Stony Plain, Alberta, for the year ending Dec. 31st, 1934, and have compared the said accounts with their relative vouchers and certify that in my opinion the foregoing financial statements are properly drawn up so as to exhibit a true and correct view of the financial affairs of the Town, according to the best of our information, the explanations given to me, and as shown by the records; subject to any qualifications mentioned in Auditor's Special Report herewith.

The statistical information contained herein was obtained from the books and records of the Town, or from information supplied by officials of the Town.

Dated at Stony Plain, Alberta, this 14th day of Jan., 1935.  
J. B. WALKER, Stony Plain, Alta.

### AUDITOR'S SPECIAL REPORT.

All books and vouchers were found in good order, and in checking throughout the year I found that same had been kept up to date.

## HON. C. STEWART ON THE BENNETT POLICIES.

When interviewed in Ottawa last week regarding Hon R B Bennett's new policies, the Hon Charles Stewart, member for West Edmonton, is reported as saying: "I believe in the conversion of St Paul but I do not believe in the conversion of R B Bennett"; and continued "Mr Bennett's attack on Mr King is fantastic when one recalls that Mr King has spent his life endeavoring to assist the wage earner, the primary producer and the consumer, and now that Mr Bennett is in fear of the electorate, he seeks to transfer the blame for his stupidity in administration of four years on the shoulders of some one else."

### John Robertson Passes Away

The death occurred at Sexsmith, Alta., on Wednesday, Jan. 16, of Mr John Robertson, father of Wm. Robertson, manager here for Gillespie Grain Co. Deceased was in his 87th year. He was born at Blair Athol, Scotland, and came with his family to Canada in 1903.

Deceased at one time resided in Stony Plain, and left here in 1933 to reside with his youngest son Alexander D at Sexsmith. The funeral took place at Sexsmith, Monday, Jan. 21.

He leaves to mourn his loss 2 sons, William of Stony Plain, and Alexander D. of Sexsmith; and 1 sister, Mrs Campbell, in Scotland.

### Brightbank News.

There promises to be a good time at Lucknow Schoolhouse Friday night, Feb. 1st, when the Girls' Club intend holding one of their popular dances.

There was lots of fun at the whist drive and dance staged on Friday last by Lucknow Athletic Club; the affair being held in the Lucknow Schoolhouse. The whist tables were well patronised and the prizes donated were greatly appreciated by the winners. Kulak's Orchestra provided the music. A dainty lunch was served at mid night.

### Steady Progress.

During the last year or more no publication has shown more remarkable strides in the matter of increased circulation than has The Family Herald and Weekly Star. This is not strange, for it is evident that in time of stress people are prone to cut down on the number and variety of magazines and papers coming into their homes, and they find in The Family Herald and Weekly Star a paper which, at \$1 per year, gives them every variety of reading, for old and young, all combined in this one publication. Every issue overflows with practical farming ideas, up-to-the-minute articles, short stories, together with a weekly newspaper section which rounds out a feast of reading without compare. Truly it has been well said that The Family Herald and Weekly Star is the best for the least.

**Dance, Muir Lake Community Hall,**  
**Friday, February 1.**

## SEARLE FINDS MUMMY WHEAT FAILS TO GERMINATE.

Every few months since the ancient tombs of Egypt were discovered, stories have been heard in various parts of the west of farmers obtaining samples of "Mummy" wheat at very high prices for a few ounces of this ancient cereal. These reports led Major H. G. L. Searle, seed expert of Searle Grain Co., to obtain, direct from the British Museum of London, Eng., a sample of genuine Mummy wheat. The seed was 3100 years old. It had been sealed away in the tombs of the kings of Egypt over a thousand years before the time of Caesar's conquest of England. Major Searle arranged for germination tests of this wheat with Dominion Seed Branch Laboratories under ideal conditions. In six days it disintegrated into dust and mould. Farmers of the West now have definite evidence that anyone professing to sell Mummy wheat at high prices, which will grow, are taking money out of their pockets for nothing.

Anyone interested in obtaining a photograph of spikelets and kernels of this 3100 year old Mummy wheat should write to Research Dept. Searle Grain Co., Winnipeg.

### C. N. Train Service.

The train No. 190 leaves Jasper for Edmonton at 10 a.m. Sundays, Wed., Friday; arrive Stony Plain 8.00 p.m.

Train No. 189 leaves Edmonton 9.40 p.m. Sun., Tues., Thurs., and arrive Stony Plain 10.37 p.m.
